Workouts: For those who want exclusive information, the Racingwithbruno team shakes the bushes at dawn to provide clients with independent, qualitative observations of works at primary tracks where we have boots on the ground. Anyone can access the date, distance, time, and where the time of a particular work falls in relation to others at that distance on that day—our workout analysis is based on years of observations and experience and is the kind of information you won't get anywhere else.

DELTA Figures: DELTA, the fourth letter in the Greek Alphabet and the name of our figure that combines the four handicapping factors that can lead to a winning performance. Three years in the making, the DELTA Figures are a combination figure that controls for the conditions of today's race. The lower the number the better chance for success in the field. DELTA Figs are the latest handicapping tool from Racingwithbruno.

DELTA Fig Key

DELTA followed by 'd' is computed off dirt race when no turf race available

DELTA followed by 't' is computed off turf race when no dirt race available

DELTA in parenthesis, '()' is computed off race more than 90 days

Workout Rankings: Racingwithbruno developed a system for ranking workouts and tested it at the windows, honing the formula through months of trial

and error. In the beginning, the rankings were constructed by hand. It was time consuming. Once we developed an algorithm it became a product we could offer to our clients and allowed us to produce rankings for any track across the country. Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. I'm not going to give our system away, but the rankings reliably indicate how a horse has been working in relation to its peers at a particular facility.

PEDIGREE DESIGNATIONS
