KEY = good chance to win **LQKQ** = very live **EXOTIC KEY** = to use in Exactas, Tri's & Super's All Races Selections/Analysis is designed to help the player make his or her decision at the window. Selections are not made to be followed blindly but to be a suggestion to supplement the players handicapping. Racingwithbruno strongly recommends for players to handicap and use Racingwithbruno suggestions to assist in wagering decisions.

Belmont Track Information:

Main: 1 1/2 miles with 1 1/8 chute

Inner Turf Course: 1 3/16 miles with 1 1/16 chute

Widener Turf Course: 1 5/16 miles with one-mile and 1 1/16 chutes

Stretch: 1,097 feet

Workouts: For those who want exclusive information, the Racingwithbruno team shakes the bushes at dawn to provide clients with independent, qualitative observations of works at primary tracks where we have boots on the ground. Anyone can access the date, distance, time, and where the time of a particular work falls in relation to others at that distance on that day—our workout analysis is based on years of observations and experience and is the kind of information you won't get anywhere else.

DELTA Figures: DELTA, the fourth letter in the Greek Alphabet and the name of our figure that combines the four handicapping factors that can lead to a winning performance. Three years in the making, the DELTA Figures are a combination figure that controls for the conditions of today's race. The lower the number the better chance for success in the field. DELTA Figs are the latest handicapping tool from Racingwithbruno.

DELTA Fig Key

DELTA followed by 'd' is computed off dirt race when no turf race available

DELTA followed by 't' is computed off turf race when no dirt race available

DELTA in parenthesis, '()' is computed off race more than 90 days

NEW FEATURE: Workmates in the workout report will now be BOLD and ALL CAPS, plus their latest Delta will be added:

Roco Rojo (22Δ) working on the turf with Waki Island (26Δ) finished in.....

As you read report you will be able to see the class level or current form ability of the ability. Additionally, you can click on the horse name and you will be what we have for the workmate over that time period. Another great feature with your BrunoWiththeWorks

Workout Rankings: Racingwithbruno developed a system for ranking workouts and tested it at the windows, honing the formula through months of trial and error. In the beginning, the rankings were constructed by hand. It was time consuming. Once we developed an algorithm it became a product we could offer to our clients and allowed us to produce rankings for any track across the country. Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. I'm not going to give our system away, but the rankings reliably indicate how a horse has been working in relation to its peers at a particular facility.
