- 8 - J C S Star - They went fast early in most recent, she tried to go with them and faded. Could get a better trip here with only Lady of Miracles wanting to be on the lead.
- 9 - Third Card Down - Second career start, Baker adds the blinkers and Lasix. Turf pedigree, Maragh usually rides for Colin Maragh and stays on here.
- 1 - Lady of Miracles - Second race off the layoff, takes a drop in class. Low DELTA, should get an aggressive ride from the rail with Davis on board.
- 5 - Day Wife - Ships in from Monmouth, keep an eye on Ryan when he comes to a NYRA track. Horses are usually pointed for certain spots and could be running at home track for higher claiming tag.

Suggested .50 cent P4: 12 || 2,5 || 1,3,4,5 || 1,4,6,7

- 12 - Gotcha Gabin - Second race with Nevin who has been on fire at this meet. Saez can be patient from the outside post and has good work since last race. Figures to be live.
- 6 - Speed Khaleesi - Rider switch to Davis for low profile connections. Rough start in most recent against open company, returns to more suitable state-bred company.
- 9 - The Giant's Vow - Cut back after trying to go route of ground. Best races have been sprinting. Won't show the same speed as previous are and Fragoso is here instead of top selection.
- 1 - Merlins Muse - Second race off the layoff for cagey barn. Her speed could be problem from the rail. She may end up being taken back by Irad to make late run.

#### HANDICAPPING SELECTIONS & STRATEGIES

2 - **La Fuerza** - Belmont summer 2yos don't usually go on to do much more after the summer, but this one looks like a very nice prospect. He faces mostly maidens.

5 - **Bustin Mach Four** - Nevinhas had a great Belmont and she is much better second out than with debut horses. Can improve here.

4 - **What the Luck** - Trained here at Belmont after taking May off? No works after maiden for a month. Short price

1 - **Hushion** - Ran second to top choice, albeit finished far back in the Bronx in that race.

#### HANDICAPPING SELECTIONS & STRATEGIES

5 - **Missle Bomb** - First time with Arriaga who is having a rough go of the meet after good start to the year. Gets rider switch after three straight wins. Has low DELTA in the field.

3 - **Forest Blue** - Class drop off the claim as barn is willing to loose for less then claiming tag. Barn is good first time off the claim.

4 - **Voluntario** - Rudy has made these drops all meet with good success. Alvarado has been his go-to guy as of late and gets back to dirt for the first time.

1 - **Major League** - Note worthy that Adsit is able to get Irad to stay in first race off the layoff. Takes a step up in class could be stalking pace setters.

1 - **Pirelli Tower** - Been red hot at the meet and takes one more swing here with this one making third start of career all here this spring and summer. Fast dosing type should be rolling late.

7 - **Mango M** - Rosario for Jose, stretches out to 9 furlongs off 6fs on the turf last out. Should show more speed.

6 - **Bad Guy** good effort last out finishing 2nd at 27-1 and Fragoso on board. Martin has had a respectable meet.

4 - **Packed House** - Asmussen with colt that last raced third at CD in May.

2 - Questeq - Improving with each start on turf since returning from short layoff. Lezcano got good run out of filly last out. Stretches out, could show a bit more speed.

5 - Kat O Mine - Returns off eight month layoff for barn that does well getting them ready for return. Gets their main rider off the layoff in Alvarado.

7 - Tandas Joy - First time with Lynch and faces N2L company in second start in two months. Gets Castellano on NYRA debut.

1 - Acorn Street - Cox/Saez on the drop from starter allowance company that really is a conditioned N2L. Might send from the rail and dictate pace.

 5 - Tequila Sunday - broke maiden easily and was DQ and placed 9th. Brought right back in same spot.  
 2 - Trinni Ninja - barn doesn't run too many, raced for this level and finished third. Should offer value in the exotics.  
 1 - Troffissio - speed and fade last out, drops in class and barn has had a good meet.  
 10 - Gentle Annie - Racingwithbruno bred this filly and she is a filly that appreciated being back on dirt, her mare had no desire for turf. She will be a big number

RACINGWITHBRUNO BULLET WORK: Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. THE RACINGWITHBRUNO BULLET WORK is the two year old that is outworking by time all others of his peers. We match up two-year-olds vs two-year-olds time wise only at 4f or longer works. As the two-year old develop during their two-year-old season we tend to use 5f works and longer for our own brand of Bullet Work. Workouts: For those who want exclusive information, the Racingwithbruno team shakes the bushes at dawn to provide clients with independent, qualitative observations of works at primary tracks where we have boots on the ground. Anyone can access the date, distance, time, and where the time of a particular work falls in relation to others at that distance on that day—our workout analysis is based on years of observations and experience and is the kind of information you won't get anywhere else.

DELTA Figures: DELTA, the fourth letter in the Greek Alphabet and the name of our figure that combines the four handicapping factors that can lead to a

winning performance. Three years in the making, the **DELTA** Figures are a combination figure that controls for the conditions of today's race. The lower the number the better chance for success in the field. **DELTA** Figs are the latest handicapping tool from Racingwithbruno.

#### **DELTA Fig Key**

**DELTA** followed by 'd' is computed off dirt race when no turf race available

**DELTA** followed by 't' is computed off turf race when no dirt race available

**DELTA** in parenthesis, '( )' is computed off race more than 90 days

**NEW FEATURE: Workmates in the workout report will now be BOLD and ALL CAPS, plus their latest Delta will be added:**

**Roco Rojo (22**Δ**) working on the turf with Waki Island (26**Δ**) finished in.....**

**As you read report you will be able to see the class level or current form ability figs, Additionally, you can click on the horse name and you will see what we have for the workmate over that time period. Another great feature with your BrunoWiththeWorks**

**Workout Rankings: Racingwithbruno developed a system for ranking workouts and tested it at the windows, honing the formula through months of trial and error. In the beginning, the rankings were constructed by hand. It was time consuming. Once we developed an algorithm it became a product we could offer to our clients and allowed us to produce rankings for any track across the country. Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. I'm not going to give our system away, but the rankings reliably indicate how a horse has been working in relation to its peers at a particular facility.**

*work tab. We make every effort to catch as many horses as possible, but as we also provide our clients with qualitative analysis of works, not just times, we must balance quantity with quantity every morning. KEY = good chance to win LQQK = very live EXOTIC KEY = to use in Exactas, Tri's & Super's All Races Selections/Analysis is designed to help the player make his or her decision at the window. Selections are not made to be followed blindly but to be a suggestion to supplement the players handicapping. Racingwithbruno strongly recommends for players to handicap and use Racingwithbruno suggestions to assist in wagering decisions.*

**RACINGWITHBRUNO BULLET WORK:** Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. **THE RACINGWITHBRUNO BULLET WORK** is the two year old that is outworking by time all others of his peers. We match up two-year-olds vs two-year-olds time wise only at 4f or longer works. As the two-year old develop during their two-year-old season we tend to use 5f works and longer for our own brand of **Bullet Work**. **Workouts:** For those who want exclusive information, the Racingwithbruno team shakes the bushes at dawn to provide clients with independent, qualitative observations of works at primary tracks where we have boots on the ground. Anyone can access the date, distance, time, and where the time of a particular work falls in relation to others at that distance on that day—our workout analysis is based on years of observations and experience and is the kind of information you won't get anywhere else.

**DELTA Figures:** **DELTA**, the fourth letter in the Greek Alphabet and the name of our figure that combines the four handicapping factors that can lead to a winning performance. Three years in the making, the **DELTA** Figures are a combination figure that controls for the conditions of today's race. The lower the number the better chance for success in the field. **DELTA** Figs are the latest handicapping tool from Racingwithbruno.

**DELTA Fig Key**

**DELTA** followed by 'd' is computed off dirt race when no turf race available

**DELTA** followed by 't' is computed off turf race when no dirt race available

**DELTA** in parenthesis, '( )' is computed off race more than 90 days

**NEW FEATURE: Workmates in the workout report will now be BOLD and ALL CAPS, plus their latest Delta will be added:**

**Roco Rojo (22Δ) working on the turf with Waki Island (26Δ) finished in.....**

**As you read report you will be able to see the class level or current form ability figs, Additionally, you can click on the horse name and you will see what we have for the workmate over that time period. Another great feature with your BrunoWiththeWorks**

**Workout Rankings:** Racingwithbruno developed a system for ranking workouts and tested it at the windows, honing the formula through months of trial and error. In the beginning, the rankings were constructed by hand. It was time consuming. Once we developed an algorithm it became a product we could offer to our clients and allowed us to produce rankings for any track across the country. Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. I'm not going to give our system away, but the rankings reliably indicate how a horse has been working in relation to its peers at a particular facility.
