2 - **Birds Eye View** - DELTA, has won at Monmouth, and this race is begging to be won by an up and comer. Ran a big effort last out at Belmont. Lezcano is Mr. Turf

4 - **Projected** - hates to win, great workhorse but don't trust him at all. He will get hammered with Jersey Joe and Chad. Strong DELTA, don't trust him

1 - **Divisidero** - I never thought Jevian Toledo fits him but Rubley is loyal to jock who wins at 11%, who has only won once on this horse in last nine times he has ridden him, needs everything right.

3 - **Dover Cliffs** - Torres is decent on the turf and winning at 11%, just won using his speed. He is another light on class, and needs a perfect trip.

3 - Midnight Bisou - Is she going to be 100% ready for this, NO. Has she trained well and looked fit, YES. In it to win it. She is by far the class of the race. Got a feeling though with two Pletcher's in she is going to get dogged here.

6 - Sun Studio - gets a rabbit in Varanasi with Paco on board, and Johnny will sit back and make one run.

4 - Electric Forest - Got a feeling Jose will come down to ride. Speed in slop at Keeneland and she is fresh. Chad fires best with horses like this.

7 - Cosmic Burst - Finished a good third, at Churchill, and takes a shot here.

In Case of Scratches

1 - Pacific Wind - hasn't won a race since May 2018 at Belmont. Has some speed but just has been firing blanks for a long time. If it was not a Chad Brown would be 15-1.

WIN; PLACE AND SHOW; EXACTA; 50-CENT TRIFECTA AND 10-CENT SUPERFECTA; DAILY DOUBLE (RACES 12-13)/50-CENT PICK 3 (RACES 12-13-14)

7 - **Maximum Security** - I don't care what figure was out of Pegasus, Max didn't run race, he wasn't sharp at all, before the race, forcing Servis to have to take blood to see what was happening, in the post parade, didn't look like self, and during the running of the race was not himself. He did stumble, but that is a product of mental sharpness, which he was not. King for a Day was a typical Pletcher geared to win the Pegasus. If the real Maximum Security shows its a procession. If, as I don't believe he likes that track.

5 - **Mucho Gusto** - Actually sat and made a big move to win going away beating Roadster, who has lost a lot of luster after looking like a real good Derby prospect. 'Gusto is good, but think he is distance challenged. He has trained well and Baffert brings him in as good of condition of any he has brought in here before. 'Gusto has never been in a race with a horse with speed of Max, but then again, if Max hates the Math track it will show.

6 - **Everfast** - Never puts two efforts back to back. He did only get beat three lengths in the Belmont, but that was a slow race. He's now due to run a good one and hit the board, that's what he does. He gets his fourth different rider in last four races.

2 - **Joevia** - Hard knocker, but when pressed he wilts. The Belmont was slow, let's face it. He got no pressure from War of Will who was taken back and was dull to begin with. If Max is Max, this guy can't handle him.

In Case of Scratches

1 - **King for a Day** - Seen this before, Pletcher loading up for the Pegasus and then working him even harder for the Haskell. Those works are much more than what's on paper. I don't trust him today and if he wins the Haskell, then he is the best horse Pletcher has ever had.

RacingwithBruno makes every effort to provide our clients with complete and accurate information. As an independent source of clocking information we are not affiliated with official track clockers and cannot ensure that we will catch every horse on the official work tab. We make every effort to catch as many horses as possible, but as we also provide our clients with qualitative analysis of works, not just times, we must balance quantity with quantity every morning. **RACINGWITHBRUNO BULLET WORK:** Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. **FONT COLOR="RED">THE RACINGWITHBRUNO BULLET WORK** is the two year old that is outworking by time all others of his peers. We match up two-year-olds vs two-year-olds time wise only at 4f or longer works. As the two-year old develop during their two-year-old season we tend to use 5f

works and longer for our own brand of **Bullet Work**.

KEY = good chance to win **LQQK** = very live **EXOTIC KEY** = to use in Exactas, Tri's & Super's All Races Selections/Analysis is designed to help the player make his or her decision at the window. Selections are not made to be followed blindly but to be a suggestion to supplement the players handicapping. Racingwithbruno strongly recommends for players to handicap and use Racingwithbruno suggestions to assist in wagering decisions.

Monmouth Park Track Information:

Main: 1 mile with 6 furlong and 1 1/4 mile chutes

Turf: 7 furlongs

Stretch: 990 feet

Workouts: For those who want exclusive information, the Racingwithbruno team shakes the bushes at dawn to provide clients with independent, qualitative observations of works at primary tracks where we have boots on the ground. Anyone can access the date, distance, time, and where the time of a particular work falls in relation to others at that distance on that day—our workout analysis is based on years of observations and experience and is the kind of information you won't get anywhere else.

DELTA Figures: **DELTA**, the fourth letter in the Greek Alphabet and the name of our figure that combines the four handicapping factors that can lead to a winning performance. Three years in the making, the **DELTA** Figures are a combination figure that controls for the conditions of today's race. The lower the number the better chance for success in the field. **DELTA** Figs are the latest handicapping tool from Racingwithbruno.

DELTA Fig Key

DELTA followed by 'd' is computed off dirt race when no turf race available

DELTA followed by 't' is computed off turf race when no dirt race available

DELTA in parenthesis, '()' is computed off race more than 90 days

Workout Rankings: Racingwithbruno developed a system for ranking workouts and tested it at the windows, honing the formula through months of trial and error. In the beginning, the rankings were constructed by hand. It was time consuming. Once we developed an algorithm it became a product we could offer to our clients and allowed us to produce rankings for any track across the country. Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. I'm not going to give our system away, but the rankings reliably indicate how a horse has been working in relation to its peers at a particular facility.

Maximum Security - B. C. *2016 New Year's Day - Lil Indy DP = 5-2-7-0-0* ★★★★★
 Love his mind, and can see how he fooled Jason Servis into running for \$16,000 or Jason read him like an open book and thought he could gamble. He is not a horse that is not going to wow you in the morning. He listens to his riders and can be stopped and started, as you witnessed in the Florida Derby. Most horses when sent from the gate can't dial it back, and once committed you have to go at their pace. MS can stop and start, and he has finished all of his races exceptionally well. He is a runner with a strong constitution. Nothing bothers him, he has sat off, but he seems always to be in control. He doesn't wait on horses, he doesn't get stuck in personal battles, he just puts his head down and rolls home. He has the mentality to handle anything.

RacingwithBruno makes every effort to provide our clients with complete and accurate information. As an independent source of clocking information we are not affiliated with official track clockers and cannot ensure that we will catch every horse on the official work tab. We make every effort to catch as many horses as possible, but as we also provide our clients with qualitative analysis of works, not just times, we must balance quantity with quantity every morning. **RACINGWITHBRUNO BULLET WORK:** Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. **THE RACINGWITHBRUNO BULLET WORK** is the two year old that is outworking by time all others of his peers. We

Monmouth Race Track Page 12 of 13 Saturday, July 20th

match up two-year-olds vs two-year-olds time wise only at 4f or longer works. As the two -year old develop during their two-year-old season we tend to use 5f works and longer for our own brand of **Bullet Work**.

KEY = good chance to win **LQK** = very live **EXOTIC KEY** = to use in Exactas, Tri's & Super's All Races Selections/Analysis is designed to help the player make his or her decision at the window. Selections are not made to be followed blindly but to be a suggestion to supplement the players handicapping. Racingwithbruno strongly recommends for players to handicap and use Racingwithbruno suggestions to assist in wagering decisions.

Monmouth Park Track Information:

Main: 1 mile with 6 furlong and 1 1/4 mile chutes

Turf: 7 furlongs

Stretch: 990 feet

Workouts: For those who want exclusive information, the Racingwithbruno team shakes the bushes at dawn to provide clients with independent, qualitative observations of works at primary tracks where we have boots on the ground. Anyone can access the date, distance, time, and where the time of a particular work falls in relation to others at that distance on that day—our workout analysis is based on years of observations and experience and is the kind of information you won't get anywhere else.

DELTA Figures: **DELTA**, the fourth letter in the Greek Alphabet and the name of our figure that combines the four handicapping factors that can lead to a winning performance. Three years in the making, the **DELTA** Figures are a combination figure that controls for the conditions of today's race. The lower the number the better chance for success in the field. **DELTA** Figs are the latest handicapping tool from Racingwithbruno.

DELTA Fig Key

DELTA followed by 'd' is computed off dirt race when no turf race available

DELTA followed by 't' is computed off turf race when no dirt race available

DELTA in parenthesis, '()' is computed off race more than 90 days

Workout Rankings: Racingwithbruno developed a system for ranking workouts and tested it at the windows, honing the formula through months of trial and error. In the beginning, the rankings were constructed by hand. It was time consuming. Once we developed an algorithm it became a product we could offer to our clients and allowed us to produce rankings for any track across the country. Our rankings rate works on a scale of horses relative to others in their peer group. We don't just look at time, we look at maidens working with maidens versus maidens working with more esteemed company, etc. I'm not going to give our system away, but the rankings reliably indicate how a horse has been working in relation to its peers at a particular facility.
